EDUCATION

Hanoi University of Science and Technology (HUST) *Oct 2020 - May 2022*
M.S. in Control Engineering and Automation
GPA: 3.67/4.0 (Very Good Grade)
Thesis: *Design an adaptive control and a state observer based on RBF neural network for the parallel robot (**Excellent Grade Thesis**)*

Hanoi University of Science and Technology (HUST) *Aug 2015 - Aug 2020*
The Degree of Engineer in Control Engineering and Automation
GPA: 3.2/4.0 (Very Good Grade)
Thesis: *Design an intelligent navigation system for the Omni mobile robot in uncertain environments **(Certificate of Best Defended Graduate Thesis)***

RESEARCH INTERESTS

Intelligent Control, Adaptive Control, Model Predictive Control, Robot Systems, and Robot Navigation.

RESEARCH EXPERIENCE

Vietnam's National project - Research and develop an intelligent mobile robot using different types of sensing technology and IoT platform, AI, and implemented in radioactive environment monitoring application *Oct 2023 - Present*
Supervisor: Dr. Ngo Manh Tien Vietnam Academy of Science and Technology

- Mentoring Graduate students
- Working on intelligent controllers for robot systems
- Proposed and Designed the Planning and Control Module

Master Project - Design adaptive controllers and a state observer for the parallel robot [1], [2] *Oct 2020 - May 2022*
Supervisor: Assoc. Prof. Nguyen Tung Lam Hanoi University of Science and Technology

- Designed a novel Adaptive Neural Network Control combined with a high-gain observer for the parallel robot, that not only improved control performance in terms of uncertainties and external noise, but compensated for conventional controllers' problems, published in [1]
- Designed a Lyapunov-based Model Predictive Controller to enhance the control performance and guarantee the convergence, published in [2]
- Mentored Undergraduate and Graduate students (2 Graduate students successfully applied for Vingroup Innovation Foundation scholarship)

Research, design, and manufacture an intelligent humanoid robot IVASTBot implemented in communication and serving people [3], [4] *Oct 2020 - Sep 2023*
Supervisor: Dr. Ngo Manh Tien Vietnam Academy of Science and Technology

- Designed and Implemented Model predictive control for mobile robots using ROS, applied into Navigation system
- Designed and Implemented the Navigation System. Experimental Result
- Mentored Graduate students

Graduation Project - Design an intelligent navigation system for the Omni mobile robot in uncertain environments *Jan 2019 - Oct 2020*

Supervisor 1: Assoc. Prof. Nguyen Tung Lam Hanoi University of Science and Technology

Supervisor 2: Dr. Ngo Manh Tien Vietnam Academy of Science and Technology

- Proposed and Designed the Planning and Control Module.
- Designed and Implemented the Navigation System.

Research and design nonlinear adaptive controllers for robot systems based on Radial Basis Function neural network (RBFNN) and Fuzzy logic [5] *Jan 2019 - Oct 2020*

Supervisor: Assoc. Prof. Nguyen Tung Lam Hanoi University of Science and Technology

- Studied and Designed nonlinear controllers, including Backstepping, Sliding Mode Control, and Dynamic Surface Control
- Studied and Designed adaptive controllers based on RBFNN and Fuzzy Logic

INDUSTRIAL EXPERIENCE

Autonomous industrial Forklifts for container loading and unloading, and smart warehouse application *Oct 2022 - Present*

Senior Robotics Engineer Goldbell Group, Singapore

- Module Owner: Pallet Docking (High Accuracy: millimeter level)
- Module Owner: Pallet Dropoff in narrow racking area
- Feature: Forklift's motion control and planning for navigation task

Auto Pilot (Autonomous Electrical Car) *Dec 2020 - Oct 2022*

Robotics Engineer VinAI Research, Vietnam

- Motion Control for Autonomous Parking Feature
- Vehicle Modeling and Control
- Vehicle State Estimation and Localization

ACHIEVEMENTS

Postgraduate Scholarships Program - Vingroup Innovation Foundation (VinIF)	*2020 - 2021*
Master program scholarship for talented student – (HUST)	*Sep 2020*
Best Defending Graduation Thesis	*July 2020*

SKILLS

Programming Languages	C/C++, Python, MATLAB/Simulink
Robotics Tool	ROS, ACADO Toolkit
